TEI ROCK DRILLS

MEM

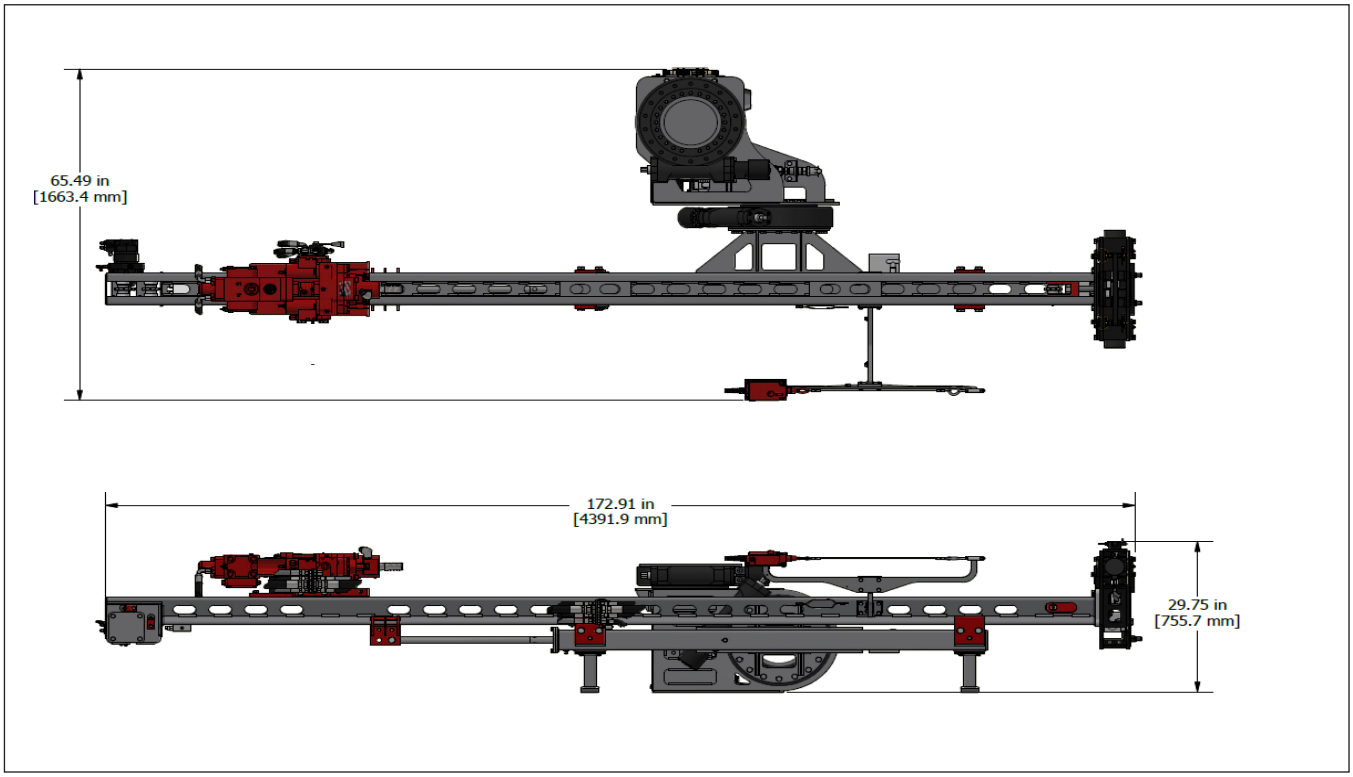

MID-WEIGHT EXCAVATOR MOUNT

The MEM is the mid-weight excavator mount for 12 ton to 15 ton excavators. The MEM incorporates many of the same features of the larger HEM drilling attachment. The MEM features the newly redesigned lighter SCF Feed System.

The MEM fits into the TEI limited access family and fills an important spot in our line up of drilling attachments. The MEM is designed for the "300" series drills and will run both rotary and percussion drill heads. The MEM is an excellent tool for installing soil nails, tie backs, rock drilling and the installation of the popular hollow bar anchors.

MID-WEIGHT EXCAVATOR MOUNT
